*Enhanced ergonomic and iconic design.*

## introduction

The sophisticated minimalism of Mirasol is the result of a design that finds its essence in a pure balance of unbroken lines. The embracing shape of the body shell is a unique piece whose surface consists of a continuous encounter of curves. The high backrest assures support for the head, while the oversized wings on the top and the large flat armrests enhances the comfort of the sitting. The stability provided by the structure of swivel metal legs and the free choice of stretch fabrics for the upholstery, they make of Mirasol a versatile Lounge chair suitable for furnishing both residential and contract interiors.

# process

The twelve month journey leading to the birth of Mirasol was characterized by an extensive work on design and a meticulous attention on details, both to guarantee the perfect ergonomics. After as preliminary phase of sketches that aims to create a design that enhances the comfort of the sit, our team in Helsinki carried out the research and development of the prototypes. Being the whole body shell of Mirasol a unique piece, it has been fundamental to find the right materials that could assure the perfect balance between stability and lightness of the entire structure.

*A structure made of unbroken lines and curves.*

# about flexhouse

Since 2012 we bring together design, development and manufacturing to make from any challenging concept a quality product. Through our offices in Warsaw, Helsinki, Toronto and London we spread our passion for design by researching, developing and prototyping using the most state of the art technology and innovative techniques. An ever expanding network of over 60 international trusted manufacturers ensures that every project, from challenging products to limited batch and complex processes are brought to reality.

*Our new office in Warsaw, Poland.*

# the founders

Cezary and Stefan founded FlexHouse in 2016 as a result of many years of prolific partnership. Coming both from a winning experience, Stefan as co-founder of One Nordic and Cezary as director of production and sourcing at Massiv Konzept, they joined the same team in 2012, when Fab.com acquired both companies, becoming later Hem. Together they deepened the understating over bold concepts, successful designs and the importance of building strong and long lasting relationships.

*Cezary Gorzynski and Stefan Mahlberg*
